## EDUCATION

<b>Bachelor of Technology</b> , GLA University, Mathura India	2021 - 2025
Computer Science : Specialisation in Artificial Intelligence and Machine Learning.	7.5
<b>Intermediate</b>	2020
Saffron Public School, Faridabad	84.2

## EXPERIENCE

### Software Developer Intern

Yeppar Smart Solutions, Jaipur Rajasthan Feb 2024 - Present

- Developed and scaled backend systems for Maruti Suzuki using Node.js, PostgreSQL, and Prisma.
- Developed a full-stack application using React.js with a backend consisting of microservices built with Node.js, PostgreSQL, Prisma, and GraphQL for Canon.

### Freelancing ([Check out](#))

Aug 2023 - March 2024

- Designed a Mobile Application in React Native and Backend in NodeJs, ExpressJs and MongoDB.
- Gained experience in handling International clients requirements, debugging, and deploying applications.

## PROJECTS

**Rate Guardian & LionQueue (npm packages)**. Engineered influential npm packages enhancing Node.js applications, each with over 200+ downloads.

- **Rate Guardian**: A tool ensuring performance excellence and abuse prevention. ([Check out](#))
- **LionQueue**: A streamlined messaging queue optimizing scalability. ([Check out](#))

### Scale Blink It ( Microservice with GraphQL) — [Check Out](#)

April 2024

- Architected Blink It's microservices backend, integrating GraphQL, Express.js, MongoDB, Redis, and Apache Kafka.
- Enhanced user and delivery agent workflows, boosting system efficiency and user experience.

### Microservices Chat App (Express.js, PostgreSQL, Prisma, Apache, Socket-io) — [Check Out](#)

Jan 2024

- Designed and composed a microservices-based chat application utilizing Express.js for backend services, PostgreSQL database with Prisma ORM, Apache Kafka messaging.

### Smart Doctor Availability Track (Production Level) — [Check Out](#)

Oct 2023

- Developed a MERN-based hospital appointment system with doctor location filtering.
- Integrated mobile proximity for availability tracking, ensuring efficient, real-time appointment handling.

### Foodie App (React Native, MongoDB, Node, Express, Redux Toolkit) — [Check Out](#)

Dec 2023

- Created a foodie app using React Native, enabling users to explore various cuisines, menus, and restaurants.

## TECHNICAL SKILLS

<b>Programming Languages</b>	Java, JavaScript, Typescript, HTML/CSS, C, Python
<b>Frameworks/Libraries</b>	Express.js, ReactJs, React Native, Tailwind CSS, NodeJs, Socket.io, Sass
<b>Technical Skills</b>	Docker, AWS, GIT, GraphQL, Apache Kafka, BullMQ
<b>Tools and Database</b>	MongoDB, PostgreSQL, Redis, SQL, Prisma, Firebase

## Achievements

- Smart India Hackathon 2023 (Runners-up)- Team Leader
- Finalist in Internal Smart India Hackathon
- Solved 500+ questions on Leetcode, GeeksforGeeks, Codeforces
- Designed 5+ Backend for NGO
